EXPLANATORY NOTES

INTRODUCTION

The Register of Commonwealth Statistical Collections is maintained as part of the responsibilities of the Australian Bureau of Statistics (ABS) for coordinating the statistical activities of Commonwealth agencies. The register contains details of collections of statistics undertaken by Commonwealth agencies. It is intended to be a guide to collection activity rather than a directory of statistics available, although many may use the register for this latter purpose.

BACKGROUND

2 Under Section 6 of the Australian Bureau of Statistics Act 1975, the ABS is charged with the coordination of the statistical activities of Commonwealth agencies, with particular regard to the avoidance of duplication in the collection of statistics, the attainment of compatibility between statistics collected by different agencies and the maximum utilisation of information collected.

3 In 1982, the Government decided that there was a need for greater coordination of Commonwealth statistical activities and that the ABS should increase its efforts in this area. The ABS was asked to:

- undertake, in conjunction with relevant agencies, examinations (or joint reports) of the agencies' statistical collections;

- maintain and publish a central register of statistical collections.

4 In 1986 a register was published providing details of ABS collections conducted between 1980-81 and 1984-85, and of collections conducted by other agencies in respect of 1983-84.

SCOPE AND COVERAGE

5 This publication lists ABS collections conducted between 1984-85 and 1988-89, and collections conducted by other Commonwealth agencies in respect of the period 1984-85 to 1987-88.

6 Collections have been included in this register if they satisfy the following criteria:

- . ABS - activities for obtaining information from outside the ABS which result in the creation of a new data holding(s) or the augmentation of an existing data holding(s).

- . Agencies other than the ABS - data collections undertaken either by themselves or by consultants or other private organisations acting on their behalf if such collections:

- were undertaken primarily for statistical purposes; or
- were not undertaken primarily for statistical purposes but yielded statistics; or
- generated statistics as by-products of administrative processes.

7 As is to be expected when covering a wide range of agencies with different functions, it is sometimes difficult to ensure strict adherence to these reporting guidelines. Individual agencies' judgements on which collections should be included were generally accepted.

8 Information relating to ABS collections was compiled from ABS records, whereas for other agencies the information was obtained from a survey of Commonwealth agencies undertaken by the ABS in November 1988.

9 It should be noted that some agencies have redefined collections reported in the 1986 publication. For example, the Department of Social Security replaced 20 collections defined in 1986 with 4 more general collections in 1989.

STRUCTURE AND CONTENT

10 Parts A, B and C of this publication comprise the basic register of collections, while Parts D, E, F and G provide indexes to either the collections or the agencies which have conducted the collections.

11 Part A of the publication lists all collections conducted by the ABS. Part B lists all collections conducted by other Commonwealth agencies - excluding the ABS and agencies whose primary responsibility relates specifically to Canberra or the Australian Capital Territory. At the time that the survey of non-ABS agencies was conducted, ACT self-government had not been proclaimed. Part C lists collections conducted by agencies whose responsibility relates specifically to Canberra or the ACT; some of these agencies have since become part of the ACT Government, others are still (October 1989) formally linked to the Commonwealth Government.

12 Part D is an index of agencies listed in alphabetical order within portfolio (as they existed in November 1988). Parts E, F and G are indexes of collections by statistical key, geographic coverage and detail, and the number of reporting units. These classifications are explained along with other classifications in the following paragraphs.

13 The following information is provided in various parts of the publication :

- . Collecting Agency (Parts A,B,C) listed in alphabetical order within agency type (ABS, Commonwealth, ACT)
- . Agency Identifier (Parts A,B,C,D)
 - Agency Identifier is in the format Ap.nnn, where A indicates Agency, p indicates Part (A, B or C), and nnn is a sequence number.
- . Collection Title (Parts A,B,C) listed in alphabetical order within agency
 - the titles of the collections are generally as reported to the ABS but sometimes with minor reorganisation to bring key words to the front of the title.
- . Collection Identifier (Parts A,B,C,E,F,G)
 - Collection Identifier is in the format Cp.nnn, where C indicates Collection, p indicates Part (A, B or C), and nnn is a sequence number.

Geographic Coverage (Parts A,B,C,F)

- Australia, New South Wales, Victoria, Queensland, Western Australia, South Australia, Tasmania, Northern Territory, Australian Capital Territory, Other (specified), Not Stated.
- in part F, Geographic Coverage is recoded to Australia, Australian Capital Territory, Other.

Geographic Detail (Parts A,B,C,F)

- for ABS collections this is the smallest area for which statistics are available.
- for agencies other than the ABS this is the smallest area for which statistics are produced.
- Geographic Detail in most instances relates to all geographic units within the Geographic Coverage.
- geographic units recorded are - Australia, States or Territories, Local Government Areas, Statistical Divisions, Capital Cities (Metropolitan Areas), Cities and Towns (Urban Areas), Postcodes, Air or Sea Ports, Other, Not Stated, Not Available (a small number of ABS collections).
- in parts A, B and C, Australia, Other, and Not Stated are not explicitly reported - part F can be used to identify the Geographic Detail in those instances.

Most Recent Collection Period (Parts A,B,C)

- this is the most recent reference period for each collection - agencies were asked to indicate the most recent period for which the data were collected.
- collections with Most Recent Collection Period prior to 1984-85 have been excluded from the publication.
- Most Recent Collection Period has been recoded to a financial year even though some collections have a point in time reference period or are based on calendar years.
- Not Stated is not explicitly reported in the publication.

Status (Parts A,B,C)

- collections with Status of Proposed, Redefined or Never Implemented have been excluded from the publication.
- collections with Status of Ceased, Discontinued or Inactive are listed as having Status "Ceased".
- Status of Current or Not Stated is not explicitly reported in the publication.

Type (Part A only)

- Direct (from informants, by form or interview);
Supplementary Collection to the Annual Agricultural Commodity Census;
Supplementary Survey to the Monthly Labour Force Survey;
Indirect (eg by-product administrative collection);
Multiple (from a number of sources, including a mix of direct and indirect collections);
Not Stated (not explicitly reported).

Coverage (Part A - Censuses/Surveys only)

- Census/Complete, Sample Survey, Partial Coverage, Other, Not Stated.
- Coverage of Other or Not Stated is not explicitly reported in the publication.

Frequency (Parts A,B,C - Censuses/Surveys only)

- this is the frequency of data collection, not the frequency of publication.
- Monthly, Quarterly, Six Monthly, Annual, Two Yearly, Five Yearly, Other (Regular), Irregular, One-off, Not Stated.
- Not Stated Frequency is not explicitly reported.

Number of Reporting Units (Parts A,B,C,G - Censuses/Surveys only)

- this is the total number of individuals, households, business units or government agencies approached by a direct survey or census on which the collection is based.

Availability (Parts B,C)

- Not Available outside the collecting agency, Available, Not Stated.
- in instances where agencies have identified that information from the collection cannot be made available outside the agency, this is explicitly reported, otherwise no information is explicitly reported; in most instances information is available.

Portfolio (Part D)

- Part D of the publication groups agencies by portfolio, as defined in the Machinery of Government changes introduced in 1987 and including the three parliamentary departments.

Statistical Key (Part E)

- Part E of the publication groups collections according to broad subject headings based on the subject classification system used in the ABS Catalogue of Publications (Cat. No. 1101.0), but modified for the purpose of this publication. Each collection can be classified up to three ways - for example the ABS collection entitled "New Fixed Capital Expenditure" is classified as 52 - National Accounts, 56 - Private Finance, and 81 - General Industry.

Contact Information (Parts B,C)

- for further information about the statistical collections of non-ABS agencies, users should contact the Branch or Section given in Parts B and C of the publication. The Contact Information is given as reported in the survey in 1988, though such information is subject to change.
